

Don't wait until Doomsday...

YOU CAN PROTECT YOURSELF AND YOUR FAMILY NOW!

HOW TO SURVIVE A NUCLEAR DISASTER

THALIF DEEN
Editor, Foreign Military
Systems Marketing Services, Inc.

EARL S. BROWNING
Col. U.S. Army (Ret.)

The first authoritative reference
of its kind ever published!
Featuring recently "declassified"
information plus new, never-
before-revealed scientific data.

Three Mile Island was no fluke... a nuclear accident could occur at anytime. *With no notice...* What would you do? Where would you go? How can your family survive the terrible heat—the fall-out—the radiation? Experts predict that 20–165 million Americans would die in an all out attack and according to a study published by the Office of Technology Assessment 12–33 million would be injured.

You owe it to your loved ones to be prepared!

You don't have to be rich to survive... *just prepared!* Now, for the first time, this life-saving handbook for every American tells you HOW. In it, you'll discover the probability of a nuclear disaster in your region... the most likely civilian and military targets in case of attack... the likelihood of survival... what precautions you can take... how to stockpile food, water, medical supplies... what post-attack life will be like... and how to endure and function in the new environment. But don't wait until it's too late. Your family's very life could be in your hands *RIGHT NOW!*

Step-by-step, and in easy-to-understand terms, the author shows you how to prepare for possible catastrophe and survive its after-effects.

For example, you'll discover how to:

- Find — or build — your own effective, low-cost shelter... pre-fabs, underground dwellings, and many more...
- Choose the right site — relatively isolated, inaccessible — and keep it safe...
- Stockpile water and food — what types yield the highest nutrition and retain it the longest. A Monthly Plan to ensure you a supply...
- How to grow your own food after fallout...
- Stock up on the proper clothing...
- Provide for fuel and light without electricity... with heaters, kerosene lamps, portable electric generators...
- Communicate with neighbors, relatives, and strangers... what to do when phones are jammed...
- Travel during — and after — the nuclear accident...
- Store drugs... medical supplies... vitamins...

And much more!

ABOUT THE AUTHORS:

THALIF DEEN is Editor of Foreign Military Markets, for Defense Marketing Systems, Inc., the leading defense market research firm. He is also a specialist in the politics of the Third World, a U.N. correspondent for ASIaweek Magazine, and an Advisor to the Sri Lanka delegation to the U.N.
