

**URGENT
OBAMACARE
REPORT**

SPECIAL INVESTOR'S ALERT

Fall 2013 Alert
\$4.95

Believe it or not you'll say...

**“THANK YOU,
BARACK
OBAMA!”**

**“Your Stinking
Healthcare
Plan Made Me
Stinking RICH!”**

FREE DETAILS INSIDE:

- How two paragraphs hidden in 2,572 pages of Obamacare could make one company's stock soar from under \$2 to as high as \$20 or more!
- Special Investor's Alert reveals how to PROTECT yourself from Obamacare... And how to PROFIT from it, too!

Angry About Obamacare?

Don't Get Mad, *Get RICH!*

**Here's How to Become the
*Next Obamacare Millionaire!***

Dear Reader,

Angry about Obamacare? I don't blame you!

Every morning's newspaper brings a new outrage from the 2,572 pages of the Affordable Care Act. Commonly known as Obamacare, this is the legislation about which Nancy Pelosi once said:

"We have to pass the bill to find out what's in it."

Well, we passed it. And now, at last, we're finding out what's really in it:

The 20 new taxes and tax increases. The trillion dollars added to our debt. The battalion of new IRS investigators hired to enforce it. The 175,000 "navigators" who will go door-to-door threatening... er, encouraging you to sign up.

But before you get angry all over again, I've got some valuable advice for you:

Don't get mad. Get *RICH!*

Because even though I believe Obamacare will have a disastrous effect on the American economy and be a back-breaking burden on many American citizens...

I also believe that a handful of Americans will make money on Obamacare. Lots of money. And I'm not just talking about the politicians, lobbyists, and pharmaceutical companies who deliberately foisted this catastrophe on the country.

I'm talking about average folks like you and me, some of whom could see their portfolios climb by 10... 20... even 30% when Obamacare kicks in on January 1, 2014. There's no reason in the world why YOU can't be one of them.

All you have to know is the answer to that age-old question:

Cui bono? Who benefits?

**Go from an Obamacare Victim to an
OBAMACARE MILLIONAIRE!**

Once you know who benefits from Obamacare, you can go from being an Obamacare victim... *to an Obamacare millionaire.*

That's why my company has prepared this *Special Investor's Alert* to let you know specifically "who benefits" from Obamacare... and how you can be one of them.

But before you can understand who benefits from Obamacare, it's important to understand exactly what the Affordable Care Act is.

**I believe Obamacare
is like a mousetrap...**

First comes the cheese...

And then—SNAP!—comes the hammer!

Everybody knows how a mousetrap works. But nobody knows how Obamacare works. Not even the

people who wrote the legislation and voted for it. Especially not them! And certainly not the people—like you and me—who are going to have to live under the yoke of this law.

But on January 1, 2014, the American people are going to learn that Obamacare works a lot like a mousetrap:

YOU play the part of the mouse. And the IRS plays the part of the hammer.

First you get a tiny taste of cheese. Then the hammer comes down on the back of your neck. But here's the point I want you to remember...

A few smart mice get away with the cheese, don't they?

How to Get Away with the Cheese!

And in the next few pages I'm going to show you how to be one of the mice who gets away with the cheese while everyone else gets the hammer.

In fact, I'm not only going to show you how to avoid getting your financial neck broken by Obamacare. I'm going to show you how to **MAKE** money on Obamacare!

When all your friends and neighbors are complaining about Obamacare. Writing angry letters to their congressmen. And crying for repeal...

YOU'RE going to be crying all the way to the bank!

More about that later. But first, what exactly is the "cheese" when it comes to Obamacare?

Well, that's the part of the law that everyone **LIKES**. And you've already gotten a little taste of that, haven't you? For example...

Everyone likes the fact that you can put your adult children under the age of 26 on your own insurance policy, right?

And everyone likes the fact that you no longer have to worry about pre-existing conditions when applying for health insurance.

And thank heaven there are no more annual or lifetime caps on the amount of benefits you can receive from your insurance company...

That's the cheese of Obamacare!

And the folks who designed Obamacare made sure the cheese came **FIRST**. Just like the folks who design mousetraps...

But on January 1, 2014...

THE HAMMER WILL FALL!

"It's not very much time," as the Wicked Witch of the West said to Dorothy. "It's not very much time at all."

Your Health Insurance Premiums Could Double

So what exactly is the hammer when it comes to Obamacare?

Well, according to *The Wall Street Journal*, your health insurance premiums could double... or even triple in the years ahead.

According to analysts at the IRS, the **CHEAPEST** health insurance policies available to the typical American working family will cost about \$20,000 per year. Even though President Obama promised that healthcare premiums would go **DOWN** by \$2,500 per year.

But your health insurance premiums are just the tip of the iceberg when it comes to the cost of Obamacare. The bigger cost is **TAXES**.

Did you know **there are no fewer than TWENTY new taxes or tax hikes that come with Obamacare**. By calling it a tax, not a penalty, Chief Justice John Roberts admitted it was the largest tax increase in the history of the United States... **BUT HE VOTED TO LET IT HAPPEN ANYWAY!**

What that means, of course, is that the IRS will have even **MORE** power to frighten and force American citizens into paying higher taxes. In fact, the Obama administration has given the IRS

(continued)

an extra \$500 million to enforce the rules and regulations of Obamacare.

And don't be surprised if **unemployment goes from bad to worse**. In fact, it's already starting to happen. Which may be the reason why the Obama administration decided to postpone the so-called "Employer Mandate" until January 1, 2015.

(That's safely AFTER the midterm elections, by the way.)

Even workers who are lucky enough to keep their jobs will see their PAYCHECKS CUT. Because the law says that if you only work 30 hours a week, your employer doesn't have to buy insurance for you.

Employers aren't stupid. They'll start turning some of their full-time employees into part-time employees by cutting their hours from 40 to 30 per week.

Disappearing Doctors

And speaking of cutting back, don't be surprised if doctors start to disappear, too. Some doctors will go bankrupt under Obamacare. Some of them will go into other lines of work. Some will take early retirement.

More importantly, thousands of bright young men and women will choose NOT to become doctors in the first place. Who can blame them?

President Obama's advice: "Maybe you'd be better off not having the surgery and taking a painkiller instead."

Obamacare will impose punishing paperwork burdens on doctors, hospitals, and the rest of the healthcare system. Who wants to spend eight years in medical school and residency just to become a poorly-paid paper pusher?

As a result, YOU are going to wait longer to see a doctor.

Don't believe me?

Romneycare in Massachusetts has ALREADY had this effect. The average waiting time to see a doctor in Massachusetts has gone from a miserable 33 days to an appalling 55 days.

Obamacare Could Turn You into a Criminal!

No wonder Congress tried to weasel out of this law almost as soon as they passed it.

"This wonderful new law applies to YOU but not US," they said. And they tried to pass a bunch of "waivers" to their buddies in labor unions and nonprofit organizations like AARP, too.

But perhaps the WORST part of Obamacare is what it does to the tradition of individual liberty and economic freedom in this country. The federal government now has the power to FORCE you to buy something you don't want.

What's next, I wonder?

Will you be forced to buy solar heating panels? Hybrid cars? Twenty-year Treasury bonds that pay an interest rate of 0.001%?

Obamacare will turn millions of honest, hardworking Americans into criminals if they don't buy health insurance.

The good news is that they CAN'T put you in jail for not buying health insurance. The bad news is that once you've finished paying the penalties, pushing the paperwork, and getting the red tape off your neck...

You may WISH you were in jail! Because prisoners are EXEMPT from Obamacare.

LUCKY THEM!

Now, let me ask you a question...

ARE YOU ANGRY YET?

Are you really hot under the collar? Ready to

Meet the Woman Who Actually **READ** the Affordable Care Act!

Dr. Betsy McCaughey

As a constitutional scholar with a Ph.D. from Columbia University, Dr. McCaughey is in a unique position to decode the legalese and explain what it means to YOU.

Perhaps you've seen Dr. McCaughey interviewed about Obamacare on CNBC, Fox News, or in the pages of *The Wall Street Journal*...

CNBC's Larry Kudlow says, "Betsy McCaughey is THE expert. She knows what's on every page of this law. She's read this job-killing law so you don't have to."

And Sally Pipes, president and CEO of the Pacific Research Institute, says "Betsy McCaughey demystifies the Affordable Care Act and tells the American people in a straightforward way what's in store for them."

write your congressman? Eager to take to the streets with a protest sign and a megaphone?

Forget about it!

Obamacare has passed Congress and passed the Supreme Court. It's the law of the land. The chances of repeal are somewhere between zero and none. So let me give you some better advice.

Don't get angry... GET RICH!

You see, despite all the horrors of Obamacare that I just laid out for you, Obamacare is going to be very, very good to some people. In fact, a few people are going to get CRAZY RICH from Obamacare. And there's no reason why you can't be one of them...

I'd like to send you these three valuable reports **ABSOLUTELY FREE** today!

How to Survive—and Thrive—Under Obamacare!

That's why I want to send you TWO FREE BOOKS and a SPECIAL FREE REPORT that will tell you everything you need to know about how to survive—and thrive!—under Obamacare.

When it comes to surviving Obamacare, I want to send you a FREE COPY of Dr. Betsy McCaughey's *New York Times* bestseller: **Beating Obamacare: Your Handbook for Surviving the New Health Care Law.**

This book flew off the shelves of bookstores nationwide at \$14.95 a pop. But I want to send it to you absolutely free.

I also want to send you a FREE copy of a new special report by investment genius Keith Fitz-Gerald called **Obamacare: Don't Get Mad, Get Rich!**

And finally I want to send you a FREE copy of Keith Fitz-Gerald's investment masterpiece: **The Money Map Method: Lifelong Wealth in a Forever-Changed World.**

What is the Money Map Method?

It's a unique new system for turning the misadventures, mistakes, and malfeasance of power-mad politicians... incompetent central bankers...and

(continued)

greedy Wall Street manipulators... INTO MORE MONEY FOR YOU!

Hard to believe? Keep reading.

Because I'm going to explain how the *Money Map Method* works in just a minute...

But first let me tell you more about the **blockbuster book by Dr. Betsy McCaughey that I want to send you for FREE.**

When Nancy Pelosi said we'd have to pass the bill to find out what's in it, she wasn't counting on Betsy McCaughey. Because Dr. McCaughey has read and studied all 2,572 pages of it.

What's the big deal about reading the bill, you ask?

Well, let me give you an idea of what one short paragraph of the Obamacare bill looks like...

1) Subparagraph (B) of section 6724(d)(1) of the Internal Revenue Code of 1986 (relating to definitions), as amended by Section 1502, is amended by striking "or" at the end of clause (xxiii), by striking "and" at the end of clause (xxiv) and inserting "or" and by inserting after clause (xxiv) the following new clause: "(xxv) section 6056 (relating to returns relating to large employers required to report on health coverage)."

As you can see, in order to fully understand the Affordable Care Act, you not only have to read the bill itself... you also have to read literally hundreds of other laws, rules, and regulations in the federal code.

Stacked on top of each other, these rules and regulations are taller than a seven-foot man!

But Dr. McCaughey has not only done this, she's done something even more important. She's broken all of this down into manageable chunks and put it into plain English.

She took 2,572 pages of government gobbledygook and put it into 168 pages of simple advice and valuable warnings. So you won't be blindsided by these new rules and regulations when they kick in on January 1, 2014.

Let me just give you a sneak peek at what's inside this \$14.95 bestselling book before I send it to you absolutely free.

But let me give you fair warning before I proceed:

Some of what you'll read in the next three minutes is going to make your hair stand on end. It's going to make your blood boil, your jaw drop, and your eyes pop out in disbelief. But let me remind you...

I don't want you to get MAD about Obamacare. I want you to get RICH from it. More about that in a moment. First the bad news from Dr. McCaughey...

On page 22 of your free book, you're going to find out **why you could get slapped with a \$2,000 fine for not having health insurance—**even if you DO have health insurance!

On page 20, you'll discover why **up to ONE THIRD of all employers in this country could stop offering health insurance to their workers.**

On page 23, you'll see **why your doctor will soon be forced to choose between the medically-appropriate treatment for you and the "officially approved" treatment.**

Think you'll be okay because you're a top executive at your company with a "gold-plated" insurance plan that covers your entire family? Think again!

The new law says that everybody from the CEO to the janitor has to have the exact same insurance policy. See page 32 for the details.

Barack's Stack Attack: Obamacare is 2,572 pages long. But when you add in all the rules and regulations, it's over 7 feet tall!

Why Your Family May Be "Uncovered"

Speaking of your family, did you know there's NOTHING in Obamacare about covering spouses and children? So if your family is currently covered by your employer's insurance, don't be surprised if that coverage vanishes overnight. See page 40.

If you decide to buy insurance on one of the new "health exchanges," the good news is that you can choose between Bronze, Silver, Gold, or Platinum plans. The bad news is that (except for the deductible) they're all exactly the same!

Which means that buying an Obamacare insurance policy is like buying a Model T from Henry Ford. "You can get a Model T in any color you want," said Ford...

"As long as it's black."

The dirty little secret about Obamacare is that millions of Americans will simply be moved over to Medicaid. Since doctors and hospitals LOSE money on Medicaid patients, they'll make up for their losses by overcharging YOU.

That's why you can expect to see your own premiums rise, even if you have private insurance!

Free preventive care sounds sensible, right? See page 60 to find out why you'll be paying for a colonoscopy even if you don't want one. You'll also pay for substance abuse coverage on your insurance policy—even if you've never touched a drink or a drug in your life!

Medicare Won't Protect You!

Maybe you think you're going to be safe from all these changes because you're on Medicare. But I've got some bad news. The government is paying the bill for Obamacare mostly by taking money from the coffers of Medicare. About a half TRILLION dollars, to be exact.

In other words, **Obamacare takes a half trillion dollars out of the pockets of elderly sick people... to give health insurance to healthy young people!** Does that make any sense to you?

In fact, Obamacare actually gives brownie points to hospitals who spend the LEAST on senior citizens. Don't believe me? See page 67.

Senior citizens will have an especially hard time getting the services they need most. On page 73, for example, you'll find out why hip replacements, knee replacements, and cataract surgery will be especially hard to get from Medicare in the months ahead. Which is why you should get some of those procedures done NOW if you can.

As President Obama once said to an elderly woman at a town hall meeting, "Maybe you'd be better off not having the surgery and taking a painkiller instead."

Well, you're going to need a LOT of painkillers when the Obamacare hammer falls on January 1, 2014!

But wait, you say, "I'll be okay, because I have a Medicare ADVANTAGE plan"...

I hate to burst your bubble. But on page 76 of your free book, you'll find out why **Medicare Advantage is targeted for HUGE cuts under Obamacare.** Many Medicare Advantage providers will simply choose to go out of business.

Good Health Insurance? Get Ready for the "Cadillac" Tax!

Or suppose you have a very good income and you've covered your family with a premium private insurance plan. Good for you!

But under Obamacare, your insurance company will be nailed with a 40% tax for selling you a "Cadillac" plan, a tax which they will certainly pass on to you.

As I mentioned earlier, there are no fewer than TWENTY new taxes or tax increases that come with Obamacare. Some of these taxes have absolutely NOTHING to do with health insurance, medicine, or healthcare.

For example, if you sell your vacation home for a profit, you'll be hit with a special Obamacare tax. Don't believe me? See page 83. The same goes for selling stocks and bonds. Or the money you make on rental property or dividends...

The government wants to dip their beak in all of it to help pay the enormous bill on Obamacare. But you can deduct your medical expenses on your tax return, right? Not like you used to! Now you'll have

(continued)

to spend a full TEN PERCENT of your income on medical expenses before you can deduct a dime.

Best Advice: Don't Get Sick!

But perhaps worst of all is that Obamacare just isn't very good coverage—especially if you happen to get sick. All the emphasis in Obamacare is on “wellness” and “prevention.” So sick people will get shortchanged.

The underlying principle behind Obamacare is to spread the healthcare coverage widely and thinly. Which means that people who need a LOT of coverage will be forced to go to the end of the line.

So if you or someone you love has cancer, diabetes, Parkinson's, Alzheimer's, or some other serious condition, you need to be very, very worried about Obamacare.

AND THAT'S WHY YOU NEED DR. McCAUGHEY'S BOOK!

As I said before, it could soon be yours absolutely free. No postage or handling. And it's yours to keep forever.

But Dr. McCaughey's book is not the ONLY thing I want to send you for free.

Because it's not enough just to SURVIVE Obamacare. I want you to THRIVE under Obamacare. And for that, you're going to need your second free gift: **Obamacare: Don't Get Mad, Get Rich!** by Keith Fitz-Gerald. This is the special report that will show you how to make money with Obamacare.

How is that possible? How can you possibly turn a profit from a government boondoggle like Obamacare? The answer is simple...

How “Deep Throat” Can Give You Deep Pockets!

It's something we call the *Money Map Method*...

The *Money Map Method* is a unique system for tracking the movement of enormous sums of money—government spending, central bank cash, and large private investments—wherever they flow around the world.

Remember when “Deep Throat” told Woodward and Bernstein that the key to solving the mystery of Watergate was to **FOLLOW THE MONEY?**

Well, that's what the *Money Map Method* does!

Only we don't just follow the money. **Our analysts find out where the smart money is going before it gets there. So you're in a perfect position to profit when the money starts falling.**

As the old song goes, “*When it's raining pennies from heaven, don't run under a tree...*”

In other words, when your fortune is falling over town, the *Money Map Method* makes sure your umbrella is turned upside down!

And that's exactly what I'm going to show you how to do in your FREE report: **Obamacare: Don't Get Mad, Get Rich!**

Let me give you just one quick example of what you'll find in this free special report.

Why Wall Street Is Wrong about Obamacare

Everybody on Wall Street ASSUMES that Obamacare will hurt companies that depend on hourly-wage workers the most—especially fast-food companies.

Because fast-food companies are going to have a hard time giving health insurance to millions of employees who barely make minimum wage.

It makes sense, right?

But wait! The folks who run these giant fast-food chains aren't stupid. If they simply take their 40-hour-per-week FULL-TIME employees and turn them into 30-hour-per-week PART-TIME employees...

They won't have to pay a penny in health insurance!

And all that savings will go right to the bottom line. In other words, **Obamacare will FORCE these companies to become even more profitable than they are today.**

They may WANT to be generous to their employees. They may WANT to provide free health insurance to everyone who works for them, not just upper management. But Obamacare will make it

downright STUPID for them to do so. And when it comes to a choice between LOSING money or MAKING money, you know which way they'll decide.

The Blue Chip Stock that Benefits from Obamacare

Take a look at McDonald's, for example. (Ticker symbol MCD.) You may have noticed that McDonald's stock has been flat recently. Because most folks on Wall Street think they'll be HURT by Obamacare.

Very few people on Wall Street right now realize that McDonald's will be greatly HELPED by Obamacare.

Now is McDonald's some over-the-counter penny stock that I'm asking you to take a flyer on? *Heck no!* McDonald's is one of the nation's biggest blue-chip stocks. With a solid-gold brand name and an unbeatable track record.

McDonald's is a true "glocal" which you'll learn all about in the *Money Map Method*. Like Coca-Cola, it's the kind of stock that Warren Buffett has built his \$50 billion fortune on, because it's ULTRA-SAFE...

It throws off reliable INCOME. McDonald's has raised its dividends every year since it started paying them way back in 1976.

And it has great potential for GROWTH. Because there are 3 billion people in the developing world who are just now joining the global economy. As these folks get more disposable income, they aren't going to want to keep eating rice and gruel...

They're going to want BURGERS AND FRIES!

So invest in McDonald's. Because unlike many other American companies, McDonald's will not only remain unscathed by Obamacare...

Obamacare will actually FORCE McDonald's to become more profitable than it is today!

"I was down over \$325,000 dollars when the market tanked. Thanks to you and your team I made it all back and I'm up over \$80,000."

—William Coon, *Money Map Subscriber*

Meet Keith Fitz-Gerald

Keith Fitz-Gerald, Chief Investment Strategist of the *Money Map Report*—has been called "The Indiana Jones of Investing." Because he travels around the globe in search of investment opportunities created by the new global economy.

You may have seen Keith interviewed on Fox Business, CNBC World, BBC, CCTV or Business News Network. Or perhaps you've seen his ideas quoted in publications like *The Wall Street Journal*, *Wired*, or *Forbes.com*.

His bestselling book *Fiscal Hangover* is considered an essential read for serious investors in the Great Recession. No wonder such financial superstars as Peter Schiff, Dr. Mark Skousen, Jon Markman, and Paul Forchione have praised his work.

As Dr. Mark Skousen says, "If you don't follow his advice, you will be left behind."

But at roughly \$90+ a share, it's not easy for the average investor to take a large position in McDonald's. Nor is it the kind of stock that could double or triple in value over a short period of time. Because blue-chip stocks like McDonald's don't usually do that.

But in your free report—***Obamacare: Don't Get Mad, Get Rich!***—I'm going to **give you the names of some OTHER companies that depend on hourly-wage workers.**

Just like McDonald's, Obamacare will actually FORCE these companies to turn full-time workers into part-time workers. And they'll apply the savings directly to the bottom line.

But unlike McDonald's, these companies have low stock prices that not only give you easy access and great value for your investment dollar... they also hold the potential for skyrocketing in price over the next few years as they spread around the world.

(continued)

HINT: In China nowadays, Colonel Sanders' chicken is more popular than General Tso's!

Why Obamacare Will Be a "Shot in the Arm" to Drug Companies

But fast food is just the tip of the iceberg. Take drug companies, for example...

Many of them have been beaten down by investors recently because some of their key patents are expiring.

Lipitor®, the popular cholesterol drug from Pfizer. Plavix®, the blood thinner from Bristol-Meyers Squibb. And the diabetes drug Actos® from Eli Lilly are just a few examples. These cash cows are stumbling toward the slaughterhouse of generic medicine.

But according to a recent article in *Forbes*, Obamacare "will pave the way for a major rebound" in sales for Big Pharma over the next decade.

Why? Millions of new customers, that's why!

"Thanks to an additional 32 million formerly-uninsured citizens becoming potential customers," says Joshua Owide of GlobalData, drug companies could see "\$115 billion of new business over a period of 10 years."

That's \$115 BILLION with a "B!" And up to \$35 billion of it will be pure profit.

In your FREE report, I'll let you know exactly which pharmaceutical stocks are likely to benefit most. But I've got something even juicier for you in your FREE report:

Two Tiny Paragraphs in Obamacare Will Make You Wealthy!

Buried in the 2,572 pages of the Affordable Care Act are two little paragraphs that could make you very rich indeed. When you clear away all the government gobbledygook, one of these paragraphs says...

The federal government may enter into contracts with private companies to buy vaccines...

And the other paragraph says...

The government not only will be buying more vaccines, but it also will be promoting their

"I just pocketed a \$5,000 profit on your LPL recommendation. Your newsletter is the best thing I've subscribed to."

—John Tanner, *Money Map* Subscriber

benefits... organizing the inoculation of millions of Americans with vaccines... and encouraging state governments to do the same.

To put this in street language, the U.S. Government is about to become the world's biggest "pusher" of vaccines!

In other words, the vaccine business, which used to be a slow-moving "backwater" of the pharmaceutical industry, is about to shoot up like a geyser!

Some analysts say the vaccine market could expand by 15% a year for the foreseeable future. According to the World Health Organization, the vaccine market could be worth \$100 billion by 2025, or four times what it is today!

So how can YOU make money on this?

Well, you could buy GlaxoSmithKline, which is the market leader in vaccines with 23% global market share. Unfortunately, at roughly \$50 a share for GSK, the potential for growth is limited.

How Obamacare Could Turn \$19,000 into \$250,000

But what if I told you there was another stock that's currently selling at only \$1.90 a share? And this company actually MAKES their own vaccines in the laboratory by synthesizing them out of DNA. So theoretically, they can attack virtually ANY infectious disease around the world...

Buy 10,000 shares of this company and you'll pay only \$19,000...

But if Obamacare causes it to rise to \$5 a share, your position could be worth \$50,000. If it goes to \$10 a share, you'll have \$100,000. And if it goes up to \$25 a share, you might be sitting on a quarter of a million dollars!

Will it be like raining pennies from heaven?

Better than that, my friend! It will be more like standing in front of a FIRE HOSE spraying hundred

dollar bills.

And you could have that fire hose aimed right at your wallet if you invest in this stock and the 3 other vaccine stocks I'll tell you about in your FREE copy of **Obamacare: Don't Get Mad, Get Rich!**

I'm going to tell you how to get your hands on this unique and very special report in a moment. But first let me give you a peek at the bigger picture.

Because figuring out how to make money from Obamacare is just one small example of how Keith Fitz-Gerald's *Money Map Method* works...

How to Find the Berkshire-Hathaway of Today

You see, the world of investing has changed. The old investment strategies have gone the way of the gold watch, the dependable pension plan, and tax-free muni bonds that pay 5% a year.

Today, we're in an era of ZERO interest rates... NEGLIGIBLE growth... and MASSIVE government spending—like Obamacare, for example.

How do you make a profit in this environment? How do you find the opportunities to make money in this new globalized and government-manipulated economy?

And, trust me, there ARE opportunities.

No scratch that. There are actually MORE opportunities available to investors today than there were in the last century—when you could get in on the ground floor of companies like Microsoft, Apple, or Berkshire-Hathaway...

But how do you SPOT them?

That's where the *Money Map Method* comes in.

Capitalize on Colossal Shifts in Economic Power

Because the *Money Map Method* is a simple, no-nonsense approach designed to help you **CAPITALIZE on the COLOSSAL shifts in social, political, and economic power** that are taking place all around you. For example...

As I mentioned a moment ago, more than 3 BILLION people in the developing world are going

to be entering the global economy for the first time over the next decade. These folks are going to want cellphones, toothpaste, television sets, DVRs, dishwashers, and deodorant.

Huge amounts of money will be made in this tectonic shift of global economics. But huge amounts of money will be LOST, too.

And if you're clinging to a portfolio of somewhere between \$300,000 and \$1,000,000 dollars, you not only have to figure out how to reach TWO MILLION—and fast! (Because that's what financial planners say is the minimum needed for a comfortable retirement nowadays.)

Hang On to What You've Got!

But you've ALSO got to hang on to what you've got!

Because there are enormous RISKS you face in this economy, too. Your money is threatened by...

► **Misguided central bankers** whose bird-brained fiscal policies will turn your bond yields and bank interest into a trickle of pennies...

► **Greedy Wall Street manipulators** whose only goal in life is to earn gigantic annual bonuses by coming up with new ways to fleece small investors...

► And **small-minded politicians** whose answer to every economic problem is MORE SPENDING and MORE DEBT...

Your only defense is to KEEP what you have. And grow it safely enough so you can't be harmed.

In short, you have to reach the stage where you have so much money that the dopey politicians... money-grubbing Wall Street sharpies... and misguided government bureaucrats can no longer hurt you. Or, as we say around here...

GROW YOUR MONEY OR LOSE IT!

How?

With the *Money Map Method*, that's how!

But before I tell you exactly HOW the *Money Map Method* works, let me whet your appetite by showing you how WELL it works:

We back-tested the *Money Map Method* against the S&P 500 Index Fund over a 12-year period. Not
(continued)

just ANY 12-year period.

We chose the twelve years between 2000 and 2012. Because they were among the most turbulent years in the history of the stock market.

During this period, there were two costly wars... two major recessions... the dot.com stock market crash of 2000... the fiscal crash of 2008... and no fewer than THREE investment “bubbles” when some stocks grew well beyond their actual value... then came plummeting back to earth.

No wonder the S&P index posted a lousy 10.7%—over **12 ½ full years!**

But guess what?

The Money Map Method would have actually GAINED 270% in value over the same period.

And this was achieved by choosing SAFER investments than the broadly-diversified S&P 500 index fund.

Better Results from SAFER Investments!

That’s why the *Money Map Method* is such a powerful tool for making money. Because it not only PROTECTS your portfolio by putting you on the firm foundation of global blue-chip stocks...

It not only gives you INCOME by concentrating on stocks that pay reliable and steady dividends...

But it also gives you the potential for EXPONENTIAL GROWTH by identifying the little-known stocks that are poised to take off like a rocket on the launchpad.

These are investments that truly MATTER. With huge opportunities to double and even triple your money.

Double- and Triple-Digit Gainers

No wonder I get so many letters from our readers saying, “Thank you, thank you, thank you...” For tipping them off to triple-digit gainers like these...

- **100% on EnerCor Technologies...**
- **102% on Altria Group...**
- **103% on ABB...**
- **117% on NetQin Mobile...**
- **135% on Yanzhou Coal Mining Company...**

Sample 50-40-10 Strategy vs S&P 500

Hypothetical Investment Results For The Period August 1, 2000 to June 21, 2013

Source: Yahoo Finance & Kitco.

Investing is risky. You can lose a substantial amount of money. Security futures are not suitable for all types of investors. Past performance does not guarantee future results.*

- **200% on Yingli Green Energy...**
- **211% on Gilead Sciences...**
- **215% on Navios Maritime...**
- **And 351% on Sinovac Biotech, Limited!**

And I’m not even going to bother telling you about the literally **dozens of upon dozens of double-digit gainers** we’ve recommended between 51% and 99%...

I’d rather take a minute to answer the more pressing question that’s on your mind right now. Namely:

“How are such gains possible?”

They’re possible because the *Money Map Method* is based on three simple principles:

- 1. It reveals to you the ongoing transfer of wealth AWAY from the “nanny states” of the West and toward the new business centers around the world...**
- 2. It shows you how you can save more and invest better DESPITE radically changing financial realities in the days ahead, and...**
- 3. It helps you build, maintain and protect your wealth SAFELY, while you hit some doubles, triples, and even a few home runs along the way...**

I’m going to send you ANOTHER free report that spells out the *Money Map Method* for you in detail. For now let it suffice to say that the key principle of the *Money Map Method* is our unique approach to allocation:

Which we call our “50-40-10” strategy...

The Case Against “Diversification”

Unless I miss my guess, as soon as you heard the word “allocation,” you probably thought of another word:

Diversification!

Because for as long as you’ve been interested in the stock market, you’ve been told that diversification is the key to enjoying growth without facing too much risk. “Don’t put all your eggs in one basket” is the well-worn advice you’ve heard a thousand times.

Well-worn and... well, **WRONG!**

I believe diversification is a good way to get poor slowly...

If you look at the people who make serious money in the markets—people like Warren Buffett, for example—their investments are not diversified...

They’re **CONCENTRATED!**

In Buffett’s case, most of his \$50+ billion portfolio is focused on railroads, insurance, and a handful of rock-solid consumer product companies like Coca-Cola.

Intelligent concentration, not mindless diversification, is the key to successful investing.

That’s why the core principle of the *Money Map Method* is our three-step concentration strategy which we call 50-40-10.

Bear in mind, the Oracle of Omaha himself quipped that diversification is for people who don’t know what they’re doing.

Well we do!

How the 50-40-10 Strategy Works

Fifty percent of our recommended portfolio goes into what we call BASE BUILDERS. These are solid, conservative, high-value investments where the emphasis is on capital preservation.

Because I believe that the return OF your money is even more important than the return ON your money... especially now.

Forty percent goes into GROWTH & INCOME stocks. Because I believe a steady flow of dividends

“I am up 86% and made a bucket full of money on this one. Thanks again.”

—Anthony Gooch, South Africa,
Money Map Subscriber

is the key to growing your portfolio.

Finally, ten percent of our portfolio goes into what we call ROCKET RIDERS. Although they carry more risk, these stocks are so well positioned to take advantage of global economic changes that they can give you double-, and even triple-digit returns on your money.

The beauty of this system is that it really **DOESN’T MATTER** which stocks you buy or when you buy them. If you happen to pick a stock or fund that doesn’t outperform over a given period of time, no big deal.

Because once you know where to **CONCENTRATE** your investments, making steady gains can become as reliable as clockwork.

When you follow this method, your money is invested in large, stable companies—most of them right here in America—that do business all around the world. Because tracking the flow of capital around the world is the key to accumulating wealth in the new global economy. Which is why the *Money Map Method* is designed to...

FOLLOW THE MONEY!

We follow it wherever it goes around the globe...

Like China’s huge investment in renewable energy sources, for example...

Or the enormous “bet” that the United States is making on Obamacare...

Like a Financial “Global Positioning System”

This is where the BIG MONEY is headed right now. **And the *Money Map Method* is like a financial “Global Positioning System” that puts you in the proper position to make a profit.** But please understand one thing...

I’m not talking about politics here. It doesn’t matter to me whether you think Obamacare is good
(continued)

for America or not. It doesn't matter to me if you believe in global warming or if you're a skeptic. I have my opinion and you have yours.

What matters is that enormous sums of money are going to be poured into these areas by governments, central banks, and private investors. And you're either going to have your "umbrella turned upside down" or you're going to get soaked!

In other words, you're either going to be crushed by this tectonic shift of global wealth, or it's going to make you very rich!

That's why I want to send you another FREE BOOK called... *The Money Map Method: Lifelong Wealth in a Forever-Changed World*.

This 77-page book is yours to keep absolutely free. In a moment, I'll tell you how to get your hands on it. But first let me give you a free peek at some of the shocking facts and unusual research advice you'll find inside...

► On page 7, you'll find out why **we'll NEVER see a strong recovery from this recession**. And why that won't stop you from making money in this market!

► On page 10, you'll learn **why the next economic downturn in America will be WORSE than the last one**. But why you do NOT have to worry about a global economic meltdown.

► Want to know why **slow-growth periods like right now are actually the BEST buying opportunities?** See page 11

► Find out on page 12 how Ben Bernanke is **engineering the mother of all financial catastrophes...** and what you can do about it WITHOUT turning tail and getting out of the market. (Which, by the way, is the WORST mistake you could possibly make right now.)

► Discover on page 15 **which nations around the world are poised for EXPLOSIVE growth** in the years ahead.

► Here's how you can actually **make MORE money in dividends than you originally paid for the stock!** Page 26 (Altria Group is a great example. It's paid investors back 1,000% in dividends alone over the years!)

► How to spot **"diamond-in-the-rough"**

stocks: Page 29

► Why **boring, ugly, and bruised stocks are among your best bets**. Page 30...

► Why the old Wall Street saying—"Cut your losses and let your winners run"—has it **exactly BACKWARDS!** Page 37

► What is the **"Hindenberg Omen"** and how does it signal the onset of a market crash? Page 43

► Why you need to **focus on what the world NEEDS**, not what it WANTS. Page 45

► The **simplest and surest way to make money in a down market**. Page 46... (George Soros made a BILLION DOLLARS using this simple trick.)

► Why there's **still money to be made in bonds**—even though everyone is heading for the exits. Page 52...

Sitting on the Sidelines Is the WORST Thing You Can Do!

I don't care how much money you have right now or how old you are. Whether you're just starting out or getting ready to retire. The *Money Map Method* offers a simple, no-nonsense approach that can help you save more... invest better... and build real wealth in the years ahead...

REMEMBER...

Sitting on the sidelines is the WORST thing you can do in this new global economy.

Because if it's raining pennies from heaven, the LAST place you want to be is taking shelter under a tree...

That's why I want to send you all 3 of these books and special reports absolutely free...

1. *Beating Obamacare: Your Handbook for Surviving the New Health Care Law* by Dr. Betsy McCaughey. It's a \$14.95 *New York Times* bestselling book that's yours free...

2. *Obamacare: Don't Get Mad, Get Rich!* Your free guide to getting the cheese from Obamacare... while everyone else gets the hammer. And...

3. *The Money Map Method: Lifelong Wealth*

in a Forever-Changed World. Your free “GPS” for following the flow of money around the world and putting yourself in the perfect place to profit...

These three gifts are yours to keep absolutely free. With no shipping or handling charges. And no obligation or commitment.

Why three free gifts?

Well, it's just my way of getting you acquainted with the *Money Map Report*.

The *Money Map Report* is Keith Fitz-Gerald's monthly research report that takes the principles of the *Money Map Method* outlined in your free book...

And uses them to give you specific suggestions about which stocks to buy, which to hold, and which to sell short.

Each issue of the *Money Map Report* contains a model portfolio that not only follows our 50-40-10 allocation strategy to a “T.” But also REBALANCES that portfolio as often as necessary to make sure your investments are giving you:

1. SAFETY FIRST! Because 50% of the portfolio is invested in rock-solid, conservative companies that do business around the world.

2. STEADY INCOME! Because 40% of the portfolio is in reliable growth and income stocks—some of which actually can pay you TEN TIMES MORE in dividends that you paid to buy them.

3. AND EXPLOSIVE GROWTH! Because 10% of the portfolio is invested in “Rocket Rider” stocks that are perfectly positioned by the *Money Map Method* to be wherever in the world it's raining money.

More than 40,000 subscribers around the world eagerly await each issue of the *Money Map Report*.

Every day our mailbox is stuffed with letters like the ones you see here from *Money Map Report* subscribers.

These folks gladly pay \$129 for a full year of information, research advice and guidance that's not available anywhere else at any price. That's less than the cost of a good pair of running shoes nowadays!

Yet you'll even pay less! (More about that in a moment.)

What subscribers are saying...

“I have \$9,375 in unrealized gains. Thanks Keith!” —Paul Binder

“I'm up \$7,329 in less than four months.” —Tim Cummings

“Keith, keep up the good work. I've made 70% in no time whatsoever.” —Bob Anderson

“I've followed your recommendations and I'm up 45K!” —Paul Westing

“I'm not a wealthy man at 62 so I'm careful with my investments. Thanks to Keith Fitz-Gerald I've already had returns of 94% and 64% with a total profit of \$15,000.” —Roger Levac

“I have made a cool 108%! Thank you.” —Michael Cosmar

“I've been a member about 6 months and I've already made between \$40k-\$50k.” —Robert Montrose

And you'll get so much more than just 12 issues. For example, you'll also get...

1. FREE WEEKLY EDITIONS OF THE *MONEY MAP REPORTER*: Direct from Keith's keyboard to your inbox, he will send you a weekly update on all the positions in our portfolio and let you know when to make a move and when to sit tight.

2. FREE EMAIL ALERTS AND RECOMMENDATIONS: If there's an opportunity developing in the market that can't wait until the next issue of *Money Map Report*, Keith will fire off an email to you anytime it's needed.

3. FREE SAFETY SWITCHES: The same

(continued)

goes for investments that are ripe for plucking. When it's time to exit a position, Keith will immediately let you know when and how to do it.

4. FREE INVESTOR BRIEFINGS: In which Keith will discuss new global trends he has identified and how you can put yourself in the right place at the right time to take full advantage of them.

5. FREE 24/7 ACCESS TO THE MONEY MAP WEB PORTAL! Your members-only website that gives unlimited, free access to every issue of the *Money Map Report*, plus every alert, recommendation, and briefing.

6. FREE "BOOTS ON THE GROUND" REPORTS FROM AROUND THE WORLD! Keith Fitz-Gerald has been called "The Indiana Jones of Investing." Not because he's as dashing as Harrison Ford. It's because he's constantly traveling around the globe in search of those hard-to-find places where extravagant government spending... loose-money policies of central banks... and the "smart money" of private investors have COME TOGETHER to create a situation where money is falling from the sky. And Keith will shoot you an email from his cellphone to make sure you're there with your umbrella turned upside down.

7. YOUR 3 FREE BONUS GIFTS! Your free copy of Dr. McCaughey's bestselling book, *Beating Obamacare...* your free copy of *Obamacare: Don't Get Mad, Get Rich!*... and your free copy of *The Money Map Method*...

Add it all up, and I think you'll agree that a subscription to the *Money Map Report* is a bargain at \$129, but...

Half-Price for the Next 10 Days

If you reply within the next 10 days, we'll cut that price in HALF! Instead of paying \$129 for the next 12 issues of the *Money Map Report*—and all the freebies, bonuses and benefits I've just described—you'll pay only: **\$49.50!**

That's actually **MORE than half off—or a savings of 62%**—for as long as our supplies of these important books last.

Why so little?

Because, frankly, financial newsletters like the *Money Map Report* only succeed if subscribers stick with us for a long time. But I can't convince you to stick with us for a long time until I've first convinced you to give us a try.

That's why I'd like you to try the first 3 ISSUES of the *Money Map Report* on a completely risk-free basis:

Read the first 3 issues of the *Money Map Report* without any risk or obligation. Take full advantage of our weekly bulletin, the *Money Map Reporter*.

Get the FREE email alerts... FREE safety switches... FREE investor briefings... and my FREE "boots-on-the-ground" reports from around the globe...

I Want to Send You All 7 of These FREE Reports Today!

They are all yours to keep when you accept this invitation today. To claim your free reports and begin your risk-free trial, please see p. 19 at the back of this report.

Put your own portfolio into the 50-40-10 structure that positions you for maximum safety... steady income... and spectacular growth...

In other words, take full advantage of the **Money Map Method** for 3 FULL MONTHS. And if, by any chance, it doesn't help you...

STRENGTHEN THE SAFETY of your investment portfolio...

INCREASE THE INCOME you get from your investments...

AND LIGHT THE FUSE OF EXPLOSIVE GROWTH by pointing you toward "Rocket Rider" stocks that have the potential for double- and triple-digit gains...

Simply let me know and I'll send you...

ALL OF YOUR MONEY BACK!

Not a pro-rated refund. Not a refund on unmailed issues. Not a "conditional" refund of any kind. But an unconditional, no-questions-asked, 100% refund on every penny you paid. Even better, you can...

KEEP your free copy of Dr. McCaughey's bestselling book, *Beating Obamacare...*

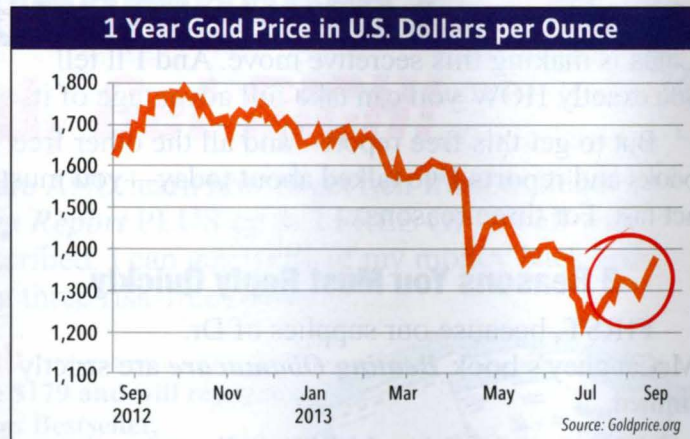

KEEP your free copy of my special report, *Obamacare: Don't Get Mad, Get Rich!* and...

KEEP your free copy of *The Money Map Method: Lifelong Wealth in a Forever-Changed World...*

And if you reply within the next 10 days, I'll also send you a FREE BONUS REPORT...

Why China Is Gobbling Up Gold!

If you own gold, I'm sure you noticed that it tanked badly in early 2013. People dumped gold like dirt when stocks started to show signs of recovery. Then gold began to make a quiet

turnaround in the summer.

Why?

China's Mysterious Hunger for Gold

The secret is just now beginning to leak out:

The Chinese are literally gobbling up ALL THE GOLD being mined in the world today!

Yes, you heard that correctly. But it's so important, I'll repeat it...

China is slowly buying up ALL OF THE WORLD'S GOLD!

I don't have to tell you what this is going to do to the price of the yellow metal in the weeks and months ahead...

You can see it's already made a sharp turn upward. But there's plenty more growth to come. I believe it not only will get back to its previous high. But it will blow through that ceiling to reach new heights in the next few years.

(continued)

© 2013 Money Map Press, LLC. The Money Map Press is a publishing company that does not act as a personal investment advisor for any specific individual. Nor do we advocate the purchase or sale of any security or investment for any specific individual. The proprietary recommendations and analysis we present to readers is for the exclusive use of subscribers. Readers should be aware that although our track record is highly rated, and has been legally reviewed for presentation in this invitation, investment markets have inherent risks and there can be no guarantee of future profits. Likewise, our past performance does not assure the same future results. Warning: The past performance of any trade whether actual or hypothetical is not necessarily an indication of future results. Stocks, futures, currencies, commodities, CFDs, options and all types of investment trading can have large potential rewards, but also carry large potential risks. We make absolutely no representation that gains or losses demonstrated in services published by Money Map Press LLC are likely or achievable. Hypothetical trading examples also cannot possibly take into account the impact of liquidity or buyer and seller demand, and do not allow for slippage and associated trading costs and concerns. One must be aware of the risks and be willing to accept them in order to invest in the markets. One should never trade with money that one cannot afford to lose, and one must accept that there will be losses, and one must be able to sustain these losses, both from a financial as well as an emotional perspective. Recommendations are for the exclusive use of subscribers and can change at any time. This work is based on SEC filings, current events, interviews, corporate press releases, and what we've learned as financial journalists. It may contain errors and you shouldn't make any investment decision based solely on what you read here. It's your money and your responsibility. * Hypothetical performance results have many limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results.

In your free special report, I'll explain WHY China is making this secretive move. And I'll tell you exactly HOW you can take full advantage of it.

But to get this free report—and all the other free books and reports I've talked about today—you must act fast. For three reasons...

3 Reasons You Must Reply Quickly

FIRST, because our supplies of Dr. McCaughey's book *Beating Obamacare* are strictly limited...

As you can imagine, I had to pull some strings with the publisher, who happens to be a personal friend of mine, to get enough copies of this \$14.95 *New York Times* bestseller at a wholesale price that would make this free giveaway feasible.

"Friendship or no friendship," he said, "I can only give you so many copies at this price and no more."

So you must reply now before others do to make sure we don't run out of books before you order...

SECOND, you must act because if you're in your mid-fifties or older—like me—you don't have that much time to build the kind of portfolio that is...

SO STRONG in its ability to withstand turbulent markets...

SO RELIABLE in throwing off steady income, and...

SO PERFECTLY POSITIONED to take advantage of the global growth opportunities ahead...

That you'll not only have enough money for a comfortable retirement, but you'll also have enough so that it really doesn't MATTER how badly Obamacare hurts the economy.

The Hammer Falls on January 1st!

January 1, 2014, will be here before you know it!

That's when the hammer falls on Obamacare. And that's when the individual mandate goes into effect. Plus many of the other disastrous rules and

regulations in this 2,572-page nightmare.

But it's also when the real opportunities for smart investors kick in!

If you wait until it's OBVIOUS to everyone where the smart money is going, the big gains ALREADY will be gone. They'll be scooped up by the investors who got there first.

That's why it's so URGENT that you reply within the next 10 days. If you do, you'll get your:

FREE copy of Dr. McCaughey's bestseller *Beating Obamacare*...

FREE copy of our special report *Obamacare: Don't Get Mad, Get Rich!*...

And FREE copy of Keith Fitzgerald's strategic manifesto, *The Money Map Method*...

Plus the FREE BONUS report: *Why China Is Gobbling Up Gold!*...

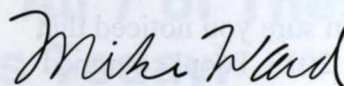

All of that just for taking a risk-free look at the *Money Map Report* for 3 FULL MONTHS without obligation or commitment.

Please reply today.

Because there's no need to get MAD about Obamacare...When you can get RICH!

To get started immediately, call **1-866-460-9039** or go online to **www.MoneyMapReport.com/Obamacare**. Or simply return the attached order form in the postage paid envelope I've provided.

Sincerely,

Mike Ward
Publisher, *Money Map Report*

P.S. As a special bonus, I have three additional reports ready for you absolutely free. *The Great Energy Awakening*, *Tomorrow's Overtakers* and *Unconventional Income Accelerators* are yours to keep if you take me up on two years worth of savings. Call **1-866-460-9039** or visit **www.MoneyMapReport.com/Obamacare** now and let me know where I should send your free reports.

Angry About Obamacare?
