

“Invest with confidence in an uncertain market”

There’s nothing to fear when you have VectorVest working for you

“In today’s investment climate, you’re facing a choice of losing time and money by being on the sidelines or nervously trying to find profitable stocks at the right time...

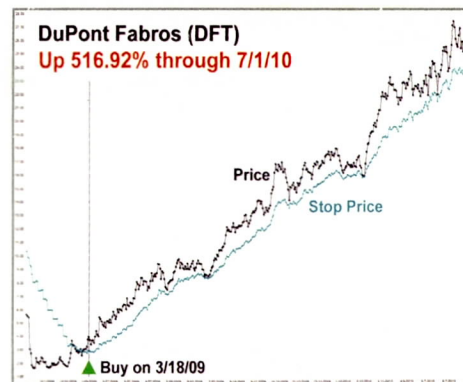

“Only VectorVest gives you the unfair advantage to pinpoint winning stocks in challenging times—just point, click and profit.”

—VectorVest® founder Bart A. DiLiddo, PhD

Even in today’s market, VectorVest helps you in 2 ways...

1. In volatile times, VectorVest finds winning stocks of 200% or more

2. AND its market-timing system tells you when to buy and when to sell

Only VectorVest’s advanced time-tested algorithm allows you to sell before a market downturn AND get you back in when the market is ready to climb—for minimum losses and maximum profits.

Meet the genius behind VectorVest®

Dr. Bart DiLiddo is one of the foremost investment experts in the world and the developer of the highly effective VectorVest system—which consistently beats those stocks picked by the “pros.”

Dr. DiLiddo isn't a broker, an analyst or a stock market prognosticator. He's a trained mathematician with a PhD from Case Western Reserve University, is a graduate of the Sloan School of Management at MIT and has a Fortune 500 business background. He knows mathematics...and he knows business.

For the past 30 years, he's used his unique combination of business experience and mathematical expertise to develop powerful formulas to analyze the performance of individual stocks, measure their risk and identify market tops and bottoms with almost foolproof accuracy.

Thousands earn double- and triple-digit profits!

Thousands of successful investors all over the world rely on his VectorVest formulas to help them lock in double- and triple-digit profits year after year in both good markets and bad.

VectorVest's track record of astounding success stems from Dr. DiLiddo's belief that mathematics could be used to analyze the performance of the stock market and of individual stocks.

“If you study the right indicators, history patterns and numbers behind a company,” says Dr. DiLiddo, “it will give you a great advantage and insight into its potential success or demise.”

The Wall Street Journal names Dr. DiLiddo a winner!

A winner of *The Wall Street Journal's* “Dart Board” stock selection contest, Dr. DiLiddo wrote for *Investor Alliances* magazine and is a regular speaker at American Association of Individual Investors meetings, *The Money Show* and other investment conferences and financial forums.

Keep reading to discover more about VectorVest and how you can get a **FREE** copy of Dr. DiLiddo's book, *Stocks, Strategies & Common Sense*. This seminal book is fast becoming the must-have book on investments. **See page 18 for all the details.**

“VectorVest has scored huge profits in Bull and Bear markets.”

And it's made spectacular gains for every type of investor

Take a look at what VectorVest users have to say...

Improved my profit by 50% “I've only had VectorVest 2 months, but it has already improved my profit by 50%. One of the first stocks that VectorVest helped me pick is Owens Illinois (OI). I bought call options that are now up 300% in 2 months.

“I am very impressed with every aspect of VectorVest. I have had to change the way I do things a little, but it has all been for the better. I have better picks and spend less time doing it.”

—G.K., Hayward, CA

Thanks for saving me from myself “I am so excited to see the markets doing exactly what your site has been telling me. I tightened my stops last week and let my portfolio extinguish itself as you suggested. Now I look at the market and the stocks that I was ‘stopped’ out of are continuing to free fall. I look forward to continuing to follow the advice and to riding the next *VectorVest Wave*.”

—J.W. Cambridge, WI

Invaluable for market timing “I have selected stocks from different strategies from the VectorVest User Group with success. I also look for VectorVest to help with market timing. Two recent examples, FNIS up 24+% and SWTX up 18%, are stocks selected using VectorVest.” —B.C., Oakland, CA

50%, 100% and 300% winners! “I took VectorVest's advice last year and got out of the market. The results have been FANTASTIC! I have had one 300% winner, three 100% winners and numerous 20%–50% winners. My wife's IRA is up 100%+ since December and my Roth is up 60%. I'm still long and very profitable from the Jail Break strategy. In a world of financial hucksters, you guys are the *real-deal*.”

—M.L., Annapolis, MD

Excellent RT indicator “You have an outstanding system and without a doubt the finest indicator (RT) ever conceived by anyone.”

—D.S., Mebane, NC

Data about stocks, industry groups and business sectors was current as of the first publication of this report. Since market conditions often change quickly, investors should not make investment decisions based on information contained herein, but should obtain updated data. Persons identified by name or initials are actual users of VectorVest U.S. Such persons have NOT been compensated for their testimonials. When no name or initials are provided, that person represents a composite of VectorVest users rather than an actual person. The \$9.95 no-risk trial offer is not available to households who have taken advantage of any similar offer within the last 12 months. Past performance does not guarantee future results.

“You can find winning stocks using any of the 9 proven VectorVest U.S. investment strategies I reveal in this report.

- **Is so easy to use you can find deeply discounted stocks with just a few clicks of a mouse.**

Bart A. DiLiddo

Bart A. DiLiddo, PhD

Dear Profit-seeking Investor,

Imagine rebalancing your portfolio just once every 6 months over the past 11 years and earning a 737.93% return.

Well, stop imagining. That's exactly what you would have achieved using VectorVest U.S. between 1/2/1996 and the day we went to press. And that was using the most conservative of the 9 strategies detailed in this report.

That means your investment of \$100,000 would have grown to a whopping \$837,930.28!

All you need is a 20-stock portfolio selected by VectorVest's Value, Safety and Timing indicator (VST) and about 20 seconds to spare in January and July.

Dr. Bart DiLiddo, breakthrough creator of VectorVest. It's the most advanced online market-timing system today—and yours to try RISK FREE.

On the first trading day in January you buy the top 20 stocks identified by VectorVest's VST indicator. Hold them till July. Then you simply sell the stocks that are no longer in the top 20 and replace them with the stocks that are. It's that simple!

From May 2005 to May 2006, this incredibly easy investment strategy raked in a profit of 88.65%.

In a moment I'll share with you **9 other easy strategies** for you to try using VectorVest U.S. These are strategies anyone can use anytime to beat the market—all it takes is a click of a mouse and VectorVest does all the work for you!

Why investors love it

With VectorVest U.S. you'll discover just how much

(Continued on page 4)

(Continued from page 3)

easier, safer and more profitable investing can be.

At last, no more sleepless nights worrying whether or not your nest egg is safe. No more having to rely on brokers and TV pundits for stock tips. And no more concerns about whether you'll have enough money when you retire.

As P.M. of Midland, Texas wrote me...

"I want to thank you and VectorVest for building my portfolio value beyond what I thought was possible entering my retirement. My portfolio value—all equities—stood at \$534,372 at the close of the year..."

its current value is \$890,290."

I receive letters and emails like this every day. They are true stories of people who have found financial independence and prosperity because of a complex algorithmic formula I created to help make investment decisions a piece of cake.

Watch your investment income zoom higher and higher

Want to see the size of your investment income skyrocket while still shooting for higher growth and capital gains? Well, that's easy enough...

I've already told you about our VST strategy, using

3 reasons you need VectorVest's Market-Timing System to buy low and sell high!

No hunches. No guesswork. No emotion-driven forecasts. VectorVest's **Market-Timing Indicator (MTI)** is based on flawless mathematical logic.

These algorithms literally tell you when to enter the market at the beginning of a bullish run. Or tell you when to exit the market, when the market has topped out and the bears are on the prowl.

The MTI relies on 3 all-important variables...

1. The VectorVest Composite (VVC): This is an average price that represents all 8,000-plus stocks in VectorVest's database. It indicates the market's direction!

2. The VVC's Relative Timing (RT) Indicator: This signals a stock's short-term price performance. It's used to confirm the VVC's signal of an upcoming trend.

3. The VVC's Buy/Sell Ratio (BSR): This variable tracks the changes in the percentage of stocks receiving a Buy or Sell recommendation.

All this data is combined into a single easy-to-use, easy-to-understand indicator called the MTI. How does it work?

If the price of the VVC goes up for 2 weeks without a downturn, this is an early sign of an uptrend. Another "up" move and it's almost certain. But we have to be sure.

Next, the VVC's trend is confirmed by the RT using a 0.0 to 2.0 scale. If the RT is above 1.0, you have a very high probability of a sustainable market uptrend. Still, the algorithm is at work to be absolutely sure.

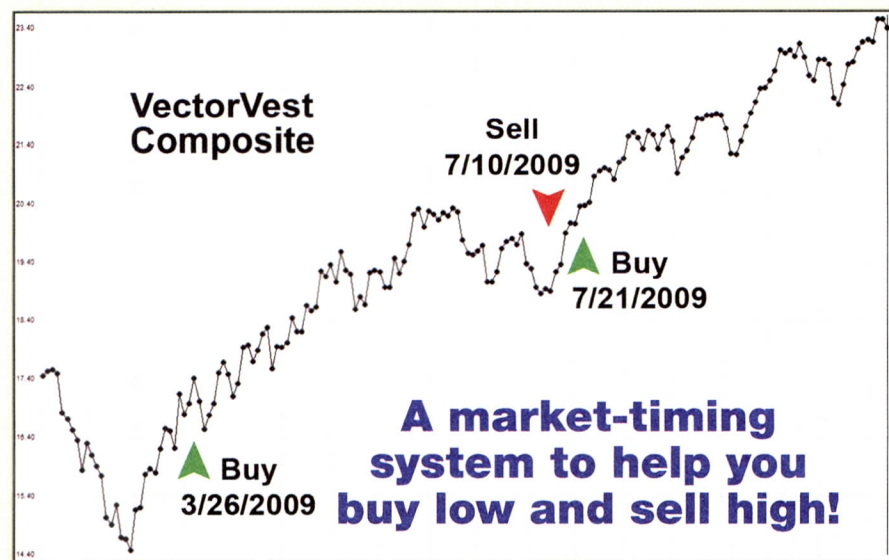

Confirms major market trends

So VectorVest uses the Buy/Sell Ratio. If there are more Buys than Sells, this ratio will be above 1.0, and you have absolute confirmation that the market has begun a sustainable bull run.

It's important to note here that the MTI does not forecast sustained major market trends—it confirms them!

For more about this incredibly accurate timing tool be sure to read Chapter 20 in **Stocks, Strategies & Common Sense**. It's a \$24.95 value—yours **FREE**—with your No-Risk 5-Week Trial of VectorVest U.S. **For details see page 18.**

Or act now and visit www.TryVectorVest.com and get started today!

On March 26, 2009, VectorVest signaled a confirmed Market Up Call; recommending prudent investors transition from bottom-fishing to top VST Buy-rated stocks.
