

What would your profits be if you didn't have to pay any taxes?

In Puerto Rico you don't pay any.

Puerto Rico is the tax-free dream you've had for years. And it's a dream that more than 100 of America's Fortune 500 blue-chip corporations are already living.

Maybe they know something you don't know.

Like what *not* paying taxes does for profit. You see, in Puerto Rico you don't pay one cent in Federal corporate tax.

What's more, you get up to 17 years of tax exemptions on all local taxes—corporate, real and

personal property, municipal taxes and license fees.

The rewards are obvious. With a higher return on investment, you can build equity values more quickly in Puerto Rico. You'll

have profits left over to invest and re-invest.

And all the while you have a young, dedicated and highly productive work force to keep helping you.

There are other advantages to being under the U.S. flag. The full value of the American dollar. The security of the U.S. constitution. No tariffs. No customs between you and your U.S. markets.

Puerto Rico. You could be down there and running in no time! Think what that could mean by *next* tax time.

Gentlemen: Please send me FREE a copy of "Why Puerto Rico is the most profitable address in the U.S.A." Also, the Tax Benefit Calculator so that I can estimate the profit advantages for me in Puerto Rico.
