

I challenge you to read this paragraph in 5 seconds.

Anyone who is an average reader can become skilled in Evelyn Wood speed reading. Students have ranged from nine to ninety-three and people with a high intelligence quotient do not necessarily achieve greater success. If you can read and understand your favorite part of the newspaper, you can learn speed reading. Furthermore, tests of our students show that comprehension and retention generally increase as you progress. Slower reading tends to become dull and discouraging.

Did you finish in 5 seconds? Of course not. In fact, hardly anyone (except Evelyn Wood graduates) could complete this test because it corresponds to a reading speed of 900 words per minute!

But with the Evelyn Wood reading dynamics system, you can finish this test easily and remember virtually every word.

Why? Because Evelyn Wood changes the way you were taught to read. You'll learn a better system, that dramatically increases reading speed along with comprehension and retention. If you're in business, faster reading means more time to make the decisions that help you get ahead. If you're a student, faster reading plus better

comprehension and recall can mean better grades and more free time. Come to a free Evelyn Wood reading lesson and we'll prove it can work for you. In just one hour, you'll be taught techniques that can increase your reading speed as much as 100%, and it's free, without obligation. You've got an hour, so spend it with Evelyn Wood.
